

300us Pulsation EMS RF Machine Commercial EMS Body Slimming Machine

Our Product Introduction

Basic Information

- Place of Origin: Shandong, China
- Brand Name: KM healthy&Beauty
- Model Number: KMslim
- Price: \$1,880.00/sets 1-9 sets
- Packaging Details: onychomycosis laser / 980nm diode laser vascular spider vein removal with Aluminum box

Product Specification

- Target Area: Body
- Type: Slimming Machine
- Feature: Weight Loss, Skin Tightening, Cellulite Reduction
- Plugs Type: AU, Other, UK, EU, US, CN, JP, Za, It
- Application: For Commercial
- After-sales Service Provided: Free Spare Parts, Online Support, Field Installation, Commissioning And Training, Video Technical Support, Field Maintenance And Repair Service
- Warranty: 2 Years
- Handles: 4 Piece Handle
- Product Name: Slim Beauty Machine
- Shape Of Stimulatio: Pulse: Transformed Wave
- Pulsation: 300us
- Output Intensity: 0~13 Tesla

Function

Function

* BUILD MUSCLE

The muscle contracts 30000 times with high frequency and intensity, so as to train and increase muscle density and volume

* REDUCE FAT

The ultimate contraction of muscle needs a large amount of energy supply, so the fat cells beside the muscle are also consumed, leading to natural apoptosis and effective reduction of fat thickness

* Muscle Sculpt

Exercising the abdominal muscles, shaping the vest line / exercising the hip muscles, creating the peach hips / exercising the abdominal oblique muscles, and shaping the mermaid line.

Four handles, included special handles for arms

Theory

WORK THEORY of EMSlim machine

Non-invasive EMS procedure induces powerful muscle contractions not achievable through voluntary contractions. When exposed to strong contractions, the muscle tissue is forced to adapt to such extreme condition, it responds with a deep remodeling of its inner structure that results in muscle building and sculpting your body.

At the same time, the 100% extreme muscle contraction of EMS technology can trigger a large amount of fat decomposition, excreted by the body's normal metabolism within a few weeks. Therefore, slim beauty machine can strengthen and increase muscle, and reduce fat at the same time.

Ems Pro induces very strong (supramaximal) muscle contractions, not achievable through workout. When exposed to these strong contractions, the muscle tissue is forced to adapt to such extreme condition. The muscle starts remodeling its inner structure by multiplication of fibers and their growth. The HIFEM uses a specific range of frequencies that does not allow muscle relaxation between two consecutive stimulations. The muscle is forced to remain in contracted state for multiple seconds. When repeatedly exposed to these high load conditions the muscle tissue is stressed and is forced to adapt. Recent studies reported that on average 15%- 16% increase in abdominal muscle thickness was observed in treated patients one to two months after HIFEM treatments.

The Ems Pro works on the abdomen area contracting and tightening the muscles to both burn fat and sculpt the area. This treatment can help you improve the muscle definition that you are already seeing from your fitness routine. It is also ideal for addressing that stubborn inch of fat on your stomach that just won't go away.

WORK HANDLE

Patented cooling technology makes it last.
 Continuous cooling technology makes the treatment head will not produce high temperature, greatly improving its output power which make it very stable.

The market magnetic wave instruments are generally only 2.5-3.0 Tesla, while the magnetic thinness can be adjusted up to 7 Tesla, The perfectly balanced continuous energy output rate is absolutely speechless in the body building equipment on the market.

Operating placement

- Body shaping
- Muscle Building
- Abdomen sculpting
- Buttocks lifting
- Thighs shaping

Easy Operate .

5 modes of movement

- ***HIIT**- High intensity interval training mode of aerobic fat reduction.
 - ***Hypertrophy** --Muscle strengthening training mode
 - ***Strength** --Muscle strength training mode
 - ***HIIT+ Hypertrophy Training** mode of strengthening muscle & reducing fat
 - ***Hypertrophy + + Strength Training** mode of strengthening muscle & muscle strength
- ems

High Efficiency

30 minutes treatments= 20000 workouts

VS

BUILD MUSCLE

The muscle contracts 30000 times with high frequency and intensity, so as to train and increase muscle density and volume

REDUCE FAT

The ultimate contraction of muscle needs a large amount of energy supply, so the fat cells beside the muscle are also consumed, leading to natural apoptosis and effective reduction of fat thickness

Treatment

Safe Treatment

Suitable for everyone - No anaesthesia - No surgery

Pulsed Electromagnetic Fields have been used in medicine for many years and are proven and effective technologies

Short Time requirement and Instant results

1 session = 30 min. / treatment area

2 sessions / a week

Total 4 sessions as a course.

And continue to improve for several weeks after treatment.

Before and After

Application-Women's "Hip"

No matter what type of butt you have, can slim beauty help you change sexy hip

*H*Type

This special type is formed by a higher and more prominent hip bone, or there is more fat distribution on both sides of the waist, so the overall appearance is square, and it is closer to "straight up and straight down", rather than a smooth curve from waist to hip.

*O*Type

This type is that the fat grows to the buttocks, which will have a mellow visual effect from the back. As long as it's not too much fat, the hip shape can be kept better.

*A*Type

In this type of hip, it is easier for the thigh to accumulate fat. Fat storage around the hips and thighs is mainly caused by female hormones. As you age, decreased hormones may cause fat to tend to be stored around the abdomen.

*V*Type

These hips are more common in middle-aged and older women. The main feature is large at the top and small at the bottom. If you don't pay attention to muscle training, this hip type will begin to change to a loose shape.

Function

Function

* BUILD MUSCLE

The muscle contracts 30000 times with high frequency and intensity, so as to train and increase muscle density and volume

*** REDUCE FAT**

The ultimate contraction of muscle needs a large amount of energy supply, so the fat cells beside the muscle are also consumed, leading to natural apoptosis and effective reduction of fat thickness.

*** BODY SHAPE**

Exercising the abdominal muscles, shaping the vest line / exercising the hip muscles, creating the peach hips / exercising the abdominal oblique muscles, and shaping the mermaid line.

Female who seeks improvement in muscle and fat--- BUTT LIFT, abs.

Models, Idols, Celebrities --- contouring a sexy figure

male who seeks improvement in muscle and fat--- muscle building, Chocolate abs.
