Weifang KM EMS Tesla Sculpt Slimming Electromagnetic Rf EMS Fat Burner Spa muscle stimulator Body Sculpting Machine

Would you want to get quick reply within 24 hours online ?

16 years beauty medical equipment manufacturer

Please contact my Tel/WhatsApp/Wechat number : **+8613792693152**

The professional machine is use for beauty salon, spa, clinic ect. We can offer **OEM/ODM** for our distributors.

EXPERIENCE THE EFFECT

- Exercise abdominal muscles and build waistline;
- Exercise buttock muscle, make honey peach buttock;
- Exercise the oblique abdominal muscles and shape the fishing line.

EMS SLIMMING MACHINE
New designed model only 18KG Much lighter and smaller

- No diet or excessive exercise
- High-speed fat explosion
- Attractive muscle lines

HOW DOES IT WORK?

When exposed to these contractions, the skin remains unaffected while the energy penetrates to fat and muscle layers. The muscle tissue is forced to adapt to such extreme condition.

Skin, fat and muscle form your overall body appearance. The non-invasive HIEMT procedure induces powerful muscle contractions not achievable through voluntary contractions.

The body responds with a deep remodeling of its inner structure that results in muscle building and sculpting your body.

Strong energy

Up to **7** Tesla magnetic flux density, Perfect effect.

The ordinary machine is only **2.5 – 3.0** Tesla.

Strong cooling technology

Patented cooling technology enables HI-EMT to operate continuously, without producing high temperature, which greatly improves working stability.

Application-Women's "Hip"

No matter what type of butt you have, can slim beauty help you change sexy hip

H-Type

This special type is formed by a higher and more prominent hip bone, or there is more fat distribution on both sides of the waist, so the overall appearance is square, and it is closer to "straight up and straight down", rather than a smooth curve from waist to hip.

O-Type

This type is that the fat grows to the buttocks, which will have a mellow visual effect from the back. As long as it's not too much fat, the hip shape can be kept better.

A-Type

In this type of hip, easier for the thigh to accumulate fat. Fat storage around the hips and thighs is mainly caused by female hormones. As you age, decreased hormones may cause fat to tend to be stored around the abdomen.

V-Type

These hips are more common in middle-aged and older women. The main feature is large at the top and small at the bottom. If you don't pay attention to muscle training, this hip type will begin to change to a loose shape.

Function

Function

* BUILD MUSCLE

The muscle contracts 30000 times with high frequency and intensity, so as to train and increase muscle density and volume

* REDUCE FAT

The ultimate contraction of muscle needs a large amount of energy supply, so the fat cells beside the muscle are also consumed, leading to natural apoptosis and effective reduction of fat thickness

* Muscle Sculpt

Exercising the abdominal muscles, shaping the vest line / exercising the hip muscles, creating the peach hips / exercising the abdominal oblique muscles, and shaping the mermaid line.

Operation

Hamstring

Thighs

Abdomen

Arm

Hip
