What is AI screen??

- 1.Adjustable spot,screen automatically recognizes the spot size
- 2.Treatment parameters and energy density were calculated according to the spot size
- 3.AI calculates the energy density for spot size The higher the energy density The better the effect

Automatic identification system

Correct treatment parameter will be set automatically based on spot size

Suitable for all parts of the body

Applications:

Whether you're looking to remove hair from your legs, arms, underarms, face, or bikini line, the KM D18 Diode Laser Hair Removal Machine is the perfect tool for you. The 808nm wavelength technology ensures that the device targets the hair follicles directly, leaving you with smooth, hairless skin in no time.

With its user manual, video training, and face-to-face training options, this device is easy to use and can be used by anyone, regardless of their experience level. Its portable design makes it easy to carry with you wherever you go, so you can always be prepared for any hair removal needs that may arise.

The KM D18 Diode Laser Hair Removal Machine is perfect for busy individuals who don't have the time or money to visit a salon for their hair removal needs. Its advanced technology ensures that you get professional-grade results without having to spend a fortune. It's also great for those who prefer to have the privacy and convenience of doing their hair removal at home, rather than in a salon setting.

So whether you're getting ready for a special occasion, or just want to maintain smooth, hairless skin all year round, the KM D18 Diode Laser Hair Removal Machine is the perfect home laser hair removal device for you.
