alexandrite laser with touch screen,
clinical alexandrite laser machine

Product Description

Product Description:

The Alexandrite Laser Machine is a cutting-edge Alexandrite Laser Instrument designed to deliver highly effective and safe hair removal treatments. Renowned for its precision and efficiency, this Alexandrite Laser Device utilizes a 755nm wavelength laser that targets melanin in hair follicles, making it an ideal choice for removing unwanted hair from various parts of the body. With its advanced technology, the Alexandrite Laser Machine offers fast, long-lasting results suitable for a wide range of skin types, particularly those with lighter skin tones.

One of the primary applications of the Alexandrite Laser Machine is Alexandrite Laser Hair Removal, a cosmetic procedure that has gained immense popularity due to its ability to provide smooth, hair-free skin with minimal discomfort. The device emits short pulses of laser light that are absorbed by the pigment in the hair shaft and follicle, effectively damaging the root and preventing future hair growth. The Alexandrite Laser Device's precision ensures that surrounding skin remains unharmed, making treatments safer and reducing recovery time.

Equipped with state-of-the-art cooling technology, the Alexandrite Laser Instrument minimizes pain and discomfort during treatment sessions. This feature allows for a more comfortable experience compared to traditional hair removal methods such as waxing or shaving. Additionally, the Alexandrite Laser Machine offers adjustable energy settings, enabling practitioners to customize treatments based on individual patient needs and hair types, ensuring optimal results with each session.

Another advantage of the Alexandrite Laser Device is its versatility. While primarily used for Alexandrite Laser Hair Removal, it can also be employed for other dermatological procedures, including the treatment of pigmented lesions and vascular lesions. This multi-functionality makes the Alexandrite Laser Instrument a valuable addition to any cosmetic or dermatology clinic, providing a broad spectrum of treatment options with a single device.

The Alexandrite Laser Machine is designed with user-friendly controls and a sleek interface that facilitates easy operation by medical professionals. Its ergonomic handpiece allows for precise targeting of treatment areas, ensuring even and thorough coverage. This efficiency not only enhances treatment outcomes but also reduces the duration of each session, making it convenient for both practitioners and patients.

Safety is a paramount concern with the Alexandrite Laser Device. It incorporates multiple safety mechanisms, including real-time skin contact sensors and automatic shut-off features, to prevent any accidental exposure or misuse. The device complies with international safety standards, providing peace of mind for both clinicians and clients during Alexandrite Laser Hair Removal procedures.

In summary, the Alexandrite Laser Machine represents a significant advancement in laser hair removal technology. Its powerful yet gentle laser system, combined with customizable settings and advanced cooling, makes it an excellent choice for effective Alexandrite Laser Hair Removal. Whether used in professional dermatology clinics or cosmetic centers, this Alexandrite Laser Instrument offers reliable, fast, and lasting hair removal results with minimal discomfort and downtime. Investing in this Alexandrite Laser Device means embracing innovation, safety, and superior performance in the realm of laser-based hair removal and skin treatments.

Features:

Advanced Alexandrite Laser-Hair Removal technology for effective and painless treatment

High precision Alexandrite Laser Skin Care for rejuvenation and pigmentation reduction

State-of-the-art Alexandrite Laser Instrument designed for professional dermatology clinics

Fast treatment sessions with minimal discomfort and downtime

Adjustable wavelength and pulse duration for customized skin treatments

Suitable for various skin types and hair colors

Durable and user-friendly interface for easy operation

Enhanced safety features to protect skin and ensure patient comfort

Compact and portable design for convenient use in different clinical settings

Includes training and support for optimal use of the Alexandrite Laser Machine

Technical Parameters:

Product Name	Alexandrite Laser Device
Application	Alexandrite Laser Hair Removal
Wavelength	755 nm
Pulse Duration	3 ms - 100 ms
Spot Size	10 mm x 12 mm
Energy Density	1 - 60 J/cm ²
Repetition Rate	1 - 3 Hz
Cooling System	Integrated Sapphire Contact Cooling
Power Supply	AC 110V/220V, 50/60 Hz
Dimensions	120 cm x 45 cm x 110 cm
Weight	65 kg

Applications:

The Alexandrite Laser Machine, originating from Shandong, China, is a cutting-edge device designed for a variety of aesthetic and therapeutic applications. Under the reputable brand name health&beauty, this Alexandrite Laser Aesthetic Machine, model number Laser Alexandrite 755nm, leverages advanced Alexandrite Laser Technology to deliver precise and effective treatment outcomes. Its compact packaging in a secure box ensures safe delivery, with a swift delivery time ranging from 1 to 7 days, supported by a supply ability of 100 sets. Customers can conveniently place orders starting from a minimum quantity of one unit, with flexible payment options including T/T and Western Union.

This Alexandrite Laser Therapy Device is widely used in professional clinics, dermatology centers, and beauty salons, where high-performance laser solutions are essential. Its primary application occasions include hair removal, pigmentation treatment, vascular lesion therapy, and skin rejuvenation. The 755nm wavelength Alexandrite Laser Technology enables the device to target melanin selectively, making it highly effective for treating unwanted hair on various skin types with minimal discomfort and downtime.

In addition to hair removal, the Alexandrite Laser Aesthetic Machine is ideal for addressing age spots, freckles, and other pigmentation irregularities. It is also beneficial in reducing superficial vascular lesions such as spider veins, enhancing the skin's overall appearance.

The versatility of the Alexandrite Laser Therapy Device makes it suitable for use in specialized skin care treatments, enabling practitioners to offer customized solutions for clients seeking non-invasive cosmetic improvements.

The Alexandrite Laser Machine's user-friendly interface and reliable performance make it a popular choice in both medical and beauty environments. It is often employed during beauty festivals, skin care workshops, and professional training seminars to demonstrate the efficacy of Alexandrite Laser Technology. Whether used for routine beauty maintenance or targeted therapeutic interventions, this device supports a broad range of scenarios, from individual patient treatments to large-scale beauty center operations.

Overall, the Alexandrite Laser Therapy Device by health&beauty from Shandong, China, represents an advanced, versatile, and efficient solution for modern aesthetic and dermatological needs. Its combination of innovative technology, rapid delivery, and flexible purchasing terms makes it an excellent investment for professionals seeking to enhance their service offerings with proven Alexandrite Laser Technology.

Support and Services:

Our Alexandrite Laser Machine is designed to provide efficient and precise hair removal and skin treatment solutions. To ensure optimal performance and longevity of your device, we offer comprehensive technical support and services.

Technical Support:

Our team of skilled technicians is available to assist you with installation, calibration, and troubleshooting of your Alexandrite Laser Machine. We provide detailed user manuals and training materials to help you understand the operational procedures and safety guidelines.

Maintenance Services:

Regular maintenance is crucial to maintain the effectiveness of the laser system. We offer scheduled maintenance services including system diagnostics, part replacements, and software updates to keep your machine running smoothly.

Repair Services:

In case of any malfunctions or technical issues, our repair services ensure quick and reliable restoration of your Alexandrite Laser Machine. We use genuine spare parts to guarantee the quality and safety of repairs.

Software Updates:

We provide periodic software upgrades to enhance the functionality and add new features to your Alexandrite Laser Machine. These updates help in improving treatment accuracy and user experience.

Training and Consultation:

Professional training sessions are available for operators to maximize the benefits of the Alexandrite Laser Machine. Our experts also offer consultation services to tailor treatment protocols according to specific client needs.

Warranty and Service Plans:

The Alexandrite Laser Machine comes with a standard warranty covering manufacturing defects. Additionally, extended service plans are available to provide ongoing support and maintenance beyond the warranty period.

For any technical support or service inquiries, please refer to the user manual or contact your authorized service provider.

Packing and Shipping:

Product Packaging:

The Alexandrite Laser Machine is securely packaged using high-quality, durable materials to ensure safe transportation. Each unit is carefully wrapped with protective foam and bubble wrap to prevent any damage during handling. The machine is then placed inside a sturdy, custom-designed wooden crate or reinforced cardboard box, depending on the shipping method. All accessories and components are organized and packed separately within the main packaging to avoid any movement or scratches.

Shipping:

We offer worldwide shipping for the Alexandrite Laser Machine through reliable courier services. Once your order is confirmed, the product is promptly dispatched with tracking information provided for your convenience. Shipping options include standard, expedited, and freight services, tailored to meet your delivery timeline and budget. We ensure all shipments comply with international shipping regulations and customs requirements to facilitate smooth and timely delivery.

FAQ:

Q1: Where is the Alexandrite Laser Machine manufactured?

A1: The Alexandrite Laser Machine is manufactured in Shandong, China.

Q2: What is the model number of this Alexandrite Laser Machine?

A2: The model number of the machine is Laser Alexandrite 755nm.

Q3: What is the minimum order quantity for the Alexandrite Laser Machine?

A3: The minimum order quantity is 1 unit.

Q4: How is the Alexandrite Laser Machine packaged for delivery?

A4: The machine is packaged securely in a box to ensure safe delivery.

Q5: What is the delivery time for the Alexandrite Laser Machine after placing an order?

A5: The delivery time ranges from 1 to 7 days after the order is confirmed.

Q6: What payment methods are accepted for purchasing the Alexandrite Laser Machine?

A6: We accept payments via T/T and Western Union.

Q7: What is the supply ability of the Alexandrite Laser Machine?

A7: We have a supply ability of 100 sets.
