

KM 3 Wavelengths 755+808+1064 Ice Titanium Diode Laser Hair Removal Machine 810nm Diodo Depilation machine for Sales Price

Our Product Introduction

Basic Information

- Place of Origin: Shandong, China
- Brand Name: KM Beauty
- Certification: Medical CE, ISO13485, TGA, ISO9001
- Model Number: KM360D
- Minimum Order Quantity: 1
- Packaging Details: box
- Delivery Time: 1-7days
- Supply Ability: 100sets

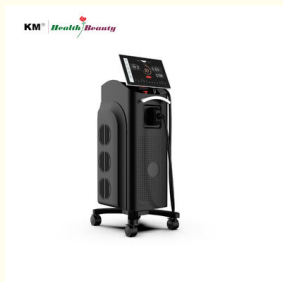

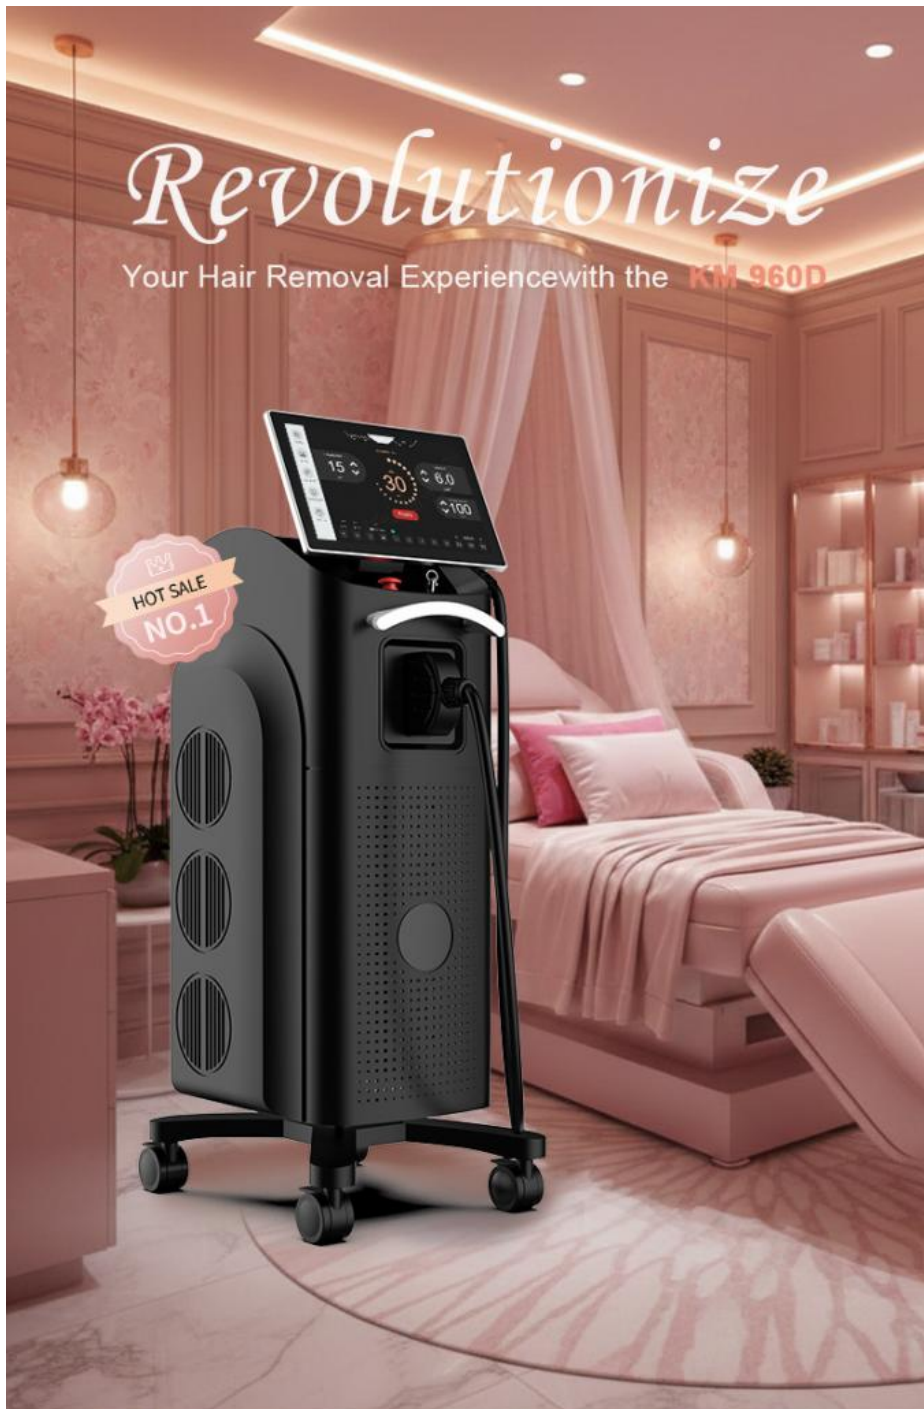

Product Specification

- Q-Switch: NO
- Laser Type: Diode Laser
- Style: Stationary
- Type: Laser
- Feature: Hair Removal, Skin Rejuvenation, Laser Diode 808
- Application: For Commercial
- After-sales Service Provided: Free Spare Parts, Online Support, Video Technical Support, Free Parts During The Warranty Time
- Warranty: 2 Years
- Machine Type: XI Laser Diodo 808
- Laser Type: Laser Titanium
- Cooling System: Supe
- Rent System: SD Card Update For Diode Laser Software
- Training: Diode Laser Hair Removal Manual

Precision & Effectiveness Diode lasers target melanin in hair follicles with high accuracy, delivering concentrated energy to destroy follicles while minimizing damage to surrounding skin. This ensures effective, long-term hair reduction.

Suitable for Diverse Skin Tones Modern diode lasers (e.g., 808 nm wavelength) penetrate deeper into follicles and are safer for darker skin types compared to older technologies like IPL, reducing risks of pigmentation or burns. **Minimal Discomfort** Built-in cooling systems (contact cooling or cryogen) soothe the skin during treatment, making the procedure relatively painless compared to other methods.

Fast Treatment Sessions Large spot sizes and rapid pulse rates allow quick coverage of areas like legs, back, or chest in 15-30 minutes, ideal for busy clients. **Long-Lasting Results** Targets hair in the active growth phase (anagen), leading to permanent reduction after 6-8 sessions, with maintenance required only occasionally.

Versatility Adjustable settings (wavelength, pulse duration, fluence) enable customization for different hair thicknesses, colors, and body areas. **Safety & Reliability** Clinically proven technology with CE certifications; lower risk of side effects when operated by trained professionals. **Low Maintenance** Diode lasers have durable components and require minimal downtime, reducing operational costs for clinics.

Super Strong Magnetism

Non-crystal Diode Laser Hair Removal

Automatic identification system
