

## Compact Alexandrite Laser Device Featuring Advanced Cooling and Variable Frequency for Comfortable Patient Experience

Our Product Introduction

for more products please visit us on wfkmdz.com

### Basic Information

- Place of Origin: Shandong, China
- Brand Name: health&beauty
- Model Number: Laser Alexandrite 755nm
- Minimum Order Quantity: 1
- Packaging Details: box
- Delivery Time: 1-7days
- Payment Terms: T/T,Western Union,Western Union
- Supply Ability: 100sets

### Product Specification

- Highlight: compact alexandrite laser device, alexandrite laser machine with cooling, variable frequency alexandrite laser

### Product Description:

The Alexandrite Laser Machine is a state-of-the-art device designed to deliver superior performance in the field of laser hair removal and dermatological treatments. Harnessing the power of advanced Alexandrite Laser Technology, this machine offers exceptional precision, efficiency, and safety, making it an ideal choice for clinics, spas, and medical professionals seeking effective solutions for hair reduction and skin rejuvenation.

At the core of this innovative device lies the Alexandrite Laser Apparatus, which utilizes a 755 nm wavelength to target melanin in hair follicles selectively. This allows the laser energy to be absorbed effectively by the pigment in the hair, while minimizing damage to the surrounding skin. The precision of the Alexandrite Laser Apparatus ensures optimal results for patients with light to olive skin tones, providing fast and comfortable treatments with minimal discomfort.

The Alexandrite Laser System is engineered with cutting-edge cooling technology that enhances patient comfort during procedures. Integrated contact cooling mechanisms protect the epidermis, reducing the risk of burns and other side effects. This feature not only improves the overall experience for patients but also allows practitioners to perform treatments at higher repetition rates, thereby increasing efficiency and reducing session times.

One of the standout features of the Alexandrite Laser Machine is its versatility. Beyond hair removal, the system is capable of treating a wide range of skin conditions including pigmented lesions, vascular lesions, and certain types of tattoo removal. The adaptability of the Alexandrite Laser Technology makes the machine a valuable multi-functional tool in any dermatology or aesthetic practice. Designed with user-friendliness in mind, the Alexandrite Laser System incorporates an intuitive touchscreen interface that allows operators to easily adjust treatment parameters according to individual patient needs. Customized settings ensure that each session is tailored for maximum effectiveness and safety. Additionally, the system is equipped with various spot sizes, enabling precise treatment of both large and small areas with consistent results.

Durability and reliability are key aspects of the Alexandrite Laser Apparatus. Built with high-quality components and rigorous quality control standards, this machine is designed to withstand the demands of frequent clinical use. Maintenance is straightforward, and the system's robust construction ensures long-term operational stability, providing practitioners with peace of mind and a solid return on investment.

Moreover, the Alexandrite Laser Machine supports rapid treatment cycles, thanks to its high pulse repetition rate. This capability not only reduces the total time required for each patient session but also increases patient throughput, which is beneficial in busy clinical environments. The combination of speed, precision, and comfort positions the Alexandrite Laser System as a leader in laser hair removal technology.

Safety is paramount with the Alexandrite Laser Technology. The system incorporates multiple safety features including real-time skin contact sensors and emergency stop functions to protect both the patient and the operator. Comprehensive training and support are typically provided by manufacturers to ensure that users can operate the device confidently and effectively.

In conclusion, the Alexandrite Laser Machine represents a pinnacle of innovation in laser treatment technology. Its advanced Alexandrite Laser Apparatus, combined with sophisticated cooling and control systems, delivers outstanding results across a variety of dermatological applications. Whether the goal is permanent hair reduction or treatment of pigmentation issues, this machine offers a reliable, efficient, and comfortable solution. Investing in the Alexandrite Laser System means equipping your practice with a technologically superior device that meets the highest standards of performance and patient care.

### Features:

- Advanced Alexandrite Laser Skin Therapy System for effective skin rejuvenation
- High-performance Alexandrite Laser Treatment Machine suitable for various skin types
- Efficient Alexandrite Laser Hair Removal Device offering long-lasting results
- Precision laser technology ensuring safe and painless procedures
- User-friendly interface with customizable settings for different treatments
- Fast treatment sessions with minimal downtime
- Durable and reliable design for consistent performance
- Compact and portable for easy mobility and installation
- Integrated cooling system to enhance patient comfort during treatments
- Comprehensive training and support included for operators

### Technical Parameters:

Product Name	Alexandrite Laser System
Model	ALS-755
Wavelength	755 nm
Pulse Duration	3 ms - 100 ms adjustable
Energy Density	1 - 60 J/cm <sup>2</sup>
Spot Size	5 mm - 18 mm adjustable
Repetition Rate	1 - 3 Hz
Cooling System	Integrated Sapphire Contact Cooling
Power Supply	AC 220V ±10%, 50/60 Hz
Dimensions	580 mm × 480 mm × 1100 mm

Weight	65 kg
Application	Alexandrite Laser Skin Therapy System for hair removal, pigmentation, and vascular lesions
Device Type	Alexandrite Laser Instrument

## Applications:

The Alexandrite Laser Machine, originating from Shandong, China, is a cutting-edge device designed to meet the diverse needs of modern beauty and medical establishments. Branded under health&beauty, this Alexandrite Laser Device, model number Laser Alexandrite 755nm, is renowned for its precision, efficiency, and reliability. With a minimum order quantity of just one unit, it is accessible to both small clinics and large medical centers, making it a versatile choice for various application occasions and scenarios.

One of the primary application occasions of the Alexandrite Laser Equipment is in dermatology clinics for hair removal treatments. Thanks to its 755nm wavelength, the device effectively targets melanin in hair follicles, providing a safe and painless solution for permanent hair reduction. It is suitable for all skin types and can be used on multiple body areas, including the face, arms, legs, and back, making it ideal for clients seeking smooth, hair-free skin.

In addition to hair removal, the Alexandrite Laser Device is widely used in aesthetic and beauty salons for skin rejuvenation treatments. It helps in reducing pigmentation, age spots, and freckles by targeting melanin-rich areas, thereby enhancing skin tone and texture. This makes the Alexandrite Laser Equipment an excellent choice for beauty professionals aiming to offer comprehensive skin care solutions.

Medical spas and cosmetic surgery centers also benefit from the advanced capabilities of this laser machine. It is used in treating vascular lesions and certain pigmented lesions, providing precise and minimally invasive therapy options. The device's packaging in a secure box ensures safe transportation, and with a delivery time of 1-7 days and a supply ability of 100 sets, it is readily available for rapid deployment in busy clinical environments.

Furthermore, the payment terms including T/T and Western Union facilitate smooth transactions for buyers worldwide, ensuring that the Alexandrite Laser Device can be quickly acquired and integrated into existing treatment protocols. Whether for permanent hair removal, skin pigmentation treatment, or vascular lesion therapy, the Alexandrite Laser Equipment from health&beauty is a reliable and efficient choice for professional applications.

## Support and Services:

Our Alexandrite Laser Machine is backed by comprehensive technical support and professional services to ensure optimal performance and customer satisfaction. We provide detailed user manuals and installation guides to help you set up and operate the machine with ease.

Our technical support team is available to assist with troubleshooting, maintenance advice, and software updates. We offer remote diagnostics and on-site service options to minimize downtime and keep your laser machine running efficiently.

Regular training sessions and webinars are available to help operators maximize the effectiveness of the Alexandrite Laser Machine while ensuring safety and compliance with industry standards.

We also provide a range of maintenance services, including calibration, parts replacement, and preventive maintenance plans tailored to your usage needs, extending the lifespan of your equipment.

For any technical inquiries or service requests, our dedicated support staff is committed to providing timely and effective solutions to meet your requirements.

## Packing and Shipping:

**Product Packaging:**

The Alexandrite Laser Machine is carefully packaged to ensure maximum protection during transit. It is securely enclosed in a custom-designed, shock-resistant foam mold inside a sturdy, reinforced cardboard box. The packaging includes anti-static materials to safeguard sensitive electronic components and is sealed with tamper-evident tape. Additionally, all accessories and user manuals are neatly organized within the package to prevent any damage or loss.

**Shipping:**

We offer reliable shipping options worldwide. The Alexandrite Laser Machine is shipped via trusted courier services that provide tracking and insurance. Handling time is typically 1-3 business days after order confirmation. Depending on the destination, delivery times may vary between 5 to 15 business days. Customers will receive a tracking number once the shipment is dispatched. For international orders, any customs duties or taxes are the responsibility of the buyer.

## FAQ:

- Q1: What is the place of origin for the Alexandrite Laser Machine?**  
A1: The Alexandrite Laser Machine is manufactured in Shandong, China.
- Q2: What is the model number of this Alexandrite Laser Machine?**  
A2: The model number is Laser Alexandrite 755nm.
- Q3: What is the minimum order quantity for the Alexandrite Laser Machine?**  
A3: The minimum order quantity is 1 unit.
- Q4: How is the Alexandrite Laser Machine packaged for delivery?**  
A4: It is packaged securely in a box to ensure safe transportation.
- Q5: What are the payment terms available for purchasing the Alexandrite Laser Machine?**  
A5: Payment can be made via T/T or Western Union.
- Q6: What is the typical delivery time for the Alexandrite Laser Machine?**  
A6: The delivery time ranges from 1 to 7 days after order confirmation.
- Q7: How many units of the Alexandrite Laser Machine can you supply?**  
A7: We have a supply ability of 100 sets.

## Alexandrite & Nd:YAG laser hair removal

+50%

24mm largest spot size available  
Treat more patients, 50% faster

Higher Laser Power. Super Long Life Span.

## Advantages

**80%**

Up to 80% permanent hair reduction after 3 treatments

**6**

Six A type ABS material probes, more sturdy and durable.

**ALL**

Treat all hair from dark and coarse to light and fine

**FIBER**

American imported laser fiber

The ultimate laser hair removal and integrated aesthetic platform for every practice.

### 755nm Alexandrite Laser

755nm I-III skin types, all color hair, especially for light hair.

### 1064nm Nd:YAG Laser

1064nm I-V skin types, all color hair, especially for dark skin.

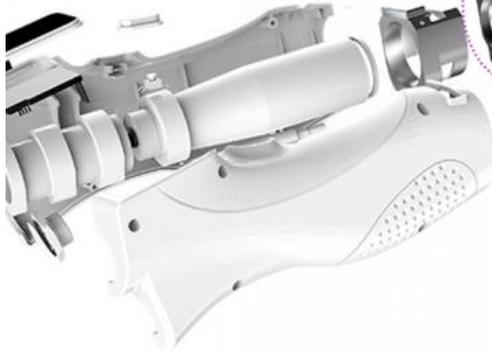

## NON TOUCH

Proprietary science engineered for patient safety and healthy

Be suitable for any parts treatment, give operator more choices

A type ABS material probemore sturdy and durable

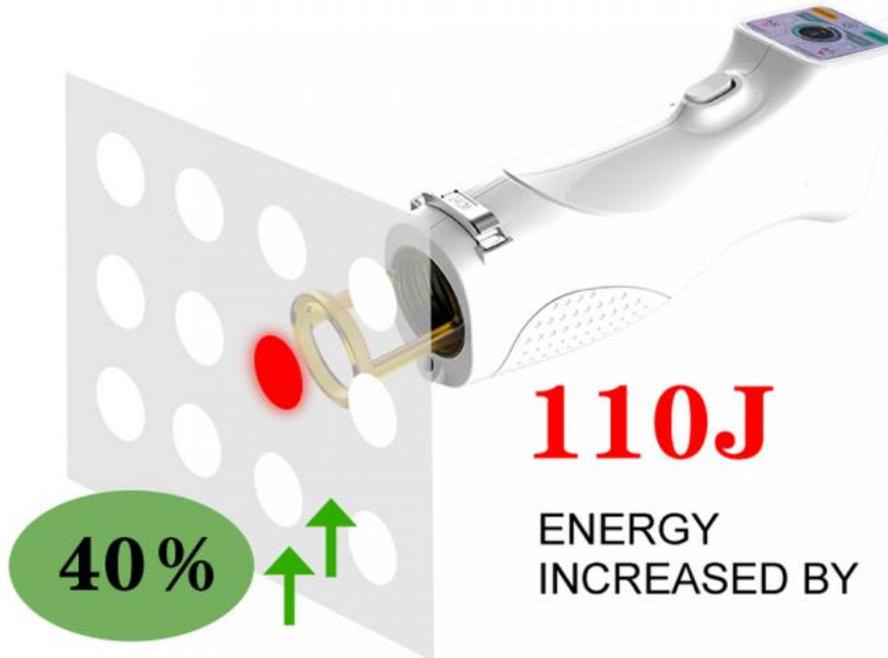

Optional

# HIGH ENERGY OUTPUT & STABILITY

Uniform spot distribution with consistent fluence ensures optimal treatment results

## Hair Removal

# PREMIUM IMPORTED CORE COMPONENTS

American fiberguide company  
imported optical fiber

British firstlight company  
imported xenon lamp

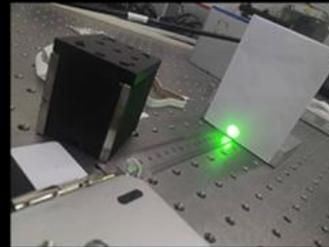

British morgan company  
imported ceramic laser cavity

Germany infineon company  
imported IGBT discharge module

American Leko high  
level 08mm laser rod

## MULTI-APPLICATION CAPABILITY

Our machine excels in various dermatological treatments

Hair Removal

Skin  
Rejuvenation

Cure Ringworm  
Of The Nails

Hemangioma  
Removal

Blood Vein  
Removal

Since 2009

# BRAND STORY

With over 17 years of specialized manufacturing experience, we began by producing products for export to high standards.

Weifang KM have got different domestic and international certificates, medical CE approved by TUV, ISO 13485, US FDA, Australia TGA, Canada MDSAP etc. patent certificates, Permits for Medical Device Production Enterprises and High-Tech Enterprise Certificate. Weifang KM always focus on HI-TECH creation and development, strictly implement international production standards. We offer various OEM/ODM services worldwide in past decades for medical equipment and aesthetics machine and home use beauty machines.
