Product Description:

The Alexandrite Laser Machine is a cutting-edge laser beauty machine designed to provide efficient, safe, and long-lasting hair removal solutions. Utilizing the advanced Alexandrite laser technology, this device specifically targets hair follicles to deliver precise and effective hair reduction, making it a popular choice for both professional clinics and beauty salons. The Alexandrite Hair Removal system is renowned for its ability to treat a wide range of skin types while offering minimal discomfort and downtime, ensuring an optimal user experience.

At the core of the Alexandrite Laser Machine is the 755nm wavelength Alexandrite laser, which has been clinically proven to be highly effective in targeting melanin within hair follicles. This wavelength is particularly suited for treating light to olive skin tones, providing fast and comfortable hair removal with excellent results. Thanks to its high repetition rate and large spot size, the machine covers larger treatment areas quickly, reducing session times and enhancing overall treatment efficiency. This makes the Alexandrite Hair Removal machine ideal for removing unwanted hair from legs, arms, underarms, face, and other body parts.

One of the standout features of this laser beauty machine is its advanced cooling system, which helps to protect the skin's surface during treatment. The integrated cooling mechanism keeps the skin cool and comfortable, significantly reducing any pain or discomfort that might be associated with laser hair removal procedures. This feature not only improves the patient's comfort but also minimizes the risk of side effects such as burns or hyperpigmentation, making the Alexandrite Hair Removal system a safe choice for repeated use.

In addition to hair removal, the Alexandrite Laser Machine offers versatile applications that extend beyond just cosmetic benefits. It can be used for the treatment of pigmented lesions, vascular lesions, and certain types of acne scars, making it a multifunctional tool in any laser beauty machine arsenal. This versatility allows practitioners to expand their service offerings and cater to a broader range of client needs, enhancing the value of their investment.

The user-friendly interface of the Alexandrite Hair Removal machine ensures that operators can easily customize treatment parameters according to the patient's skin type, hair color, and treatment area. Adjustable settings allow for precise control over energy levels, pulse duration, and frequency, which optimizes the treatment outcome and ensures maximum safety. Additionally, the machine is equipped with safety features such as emergency stop buttons and skin contact sensors, further emphasizing the importance of client safety during every session.

Durability and reliability are also key attributes of the Alexandrite Laser Machine. Built with high-quality components and engineered for consistent performance, the device promises long-term operational efficiency with minimal maintenance requirements. This reliability ensures that beauty clinics and medical spas can maintain a steady flow of clients without worrying about frequent downtime or costly repairs.

Overall, the Alexandrite Laser Machine stands out as a premier solution for those seeking professional-grade hair removal and skin treatment technology. Combining powerful Alexandrite Hair Removal capabilities with advanced cooling, safety features, and ease of use, this laser beauty machine delivers outstanding results that satisfy both practitioners and clients alike. Whether you are a seasoned professional or a newcomer to laser hair removal, investing in this Alexandrite Hair Removal device means embracing a future of effective, safe, and comfortable aesthetic treatments.

Features:

- Advanced Alex Laser 755 1064 technology for efficient treatment
- High precision Alexandrite Hair Removal for all skin types
- Multi-functional laser Beauty Machine suitable for various cosmetic procedures
- Fast and painless hair removal with minimal discomfort
- User-friendly interface with customizable settings
- Durable and reliable laser system for long-term use
- Compact and portable design for easy handling and mobility
- Safe and FDA-approved laser technology
- Effective on both light and dark hair colors
- Quick treatment sessions with lasting results

Technical Parameters:

Product Name	Alex Laser 755 1064
Type	Laser Beauty Machine
Wavelength	755 nm / 1064 nm
Laser Type	Alexandrite / Nd:YAG
Pulse Duration	3 ms - 100 ms
Spot Size	12 x 12 mm
Energy Density	1 - 120 J/cm ²
Repetition Rate	1 - 10 Hz
Cooling System	Integrated Sapphire Contact Cooling
Display	Touch Screen
Power Supply	AC 220V / 50Hz
