

## Multi Functional Alexandrite Laser Machine Suitable for Hair Removal Skin Rejuvenation and Tattoo Removal Applications

Our Product Introduction

### Basic Information

- Place of Origin: Shandong, China
- Brand Name: health&beauty
- Model Number: Laser Alexandrite 755nm
- Minimum Order Quantity: 1
- Packaging Details: box
- Delivery Time: 1-7days
- Payment Terms: T/T,Western Union,Western Union
- Supply Ability: 100sets

### Product Specification

- Highlight: Alexandrite laser hair removal machine, Alexandrite laser skin rejuvenation device, Alexandrite laser tattoo removal system

**Product Description:**

The Alexandrite Laser Machine is a state-of-the-art device designed to provide superior laser treatment solutions for a variety of dermatological and cosmetic applications. Renowned for its precision, efficiency, and safety, this advanced laser system combines the powerful capabilities of the Alex Laser 755 1064 technology with innovative features to deliver outstanding results for hair removal, skin rejuvenation, pigmentation treatment, and vascular lesion therapy.

At the core of this machine is the Alex Laser 755 1064 dual-wavelength technology, which integrates the 755 nm Alexandrite laser with the 1064 nm Nd:YAG laser. This combination allows practitioners to target different skin types and conditions effectively. The 755 nm wavelength is highly effective for treating lighter skin tones and targeting melanin-rich hair follicles, making it ideal for permanent hair reduction. Meanwhile, the 1064 nm wavelength penetrates deeper into the skin, enabling treatment of darker skin tones and vascular lesions with minimal risk of pigmentation changes or burns. This dual functionality ensures that the Alexandrite Laser Machine is versatile and suitable for a broad range of patients.

One of the standout features of this machine is its Long Pulse Gentle Pro Yag Laser mode. This mode utilizes a longer pulse duration to provide gentle yet effective laser energy delivery, minimizing discomfort and reducing the risk of side effects such as redness or swelling. The Long Pulse Gentle Pro Yag Laser is particularly beneficial for treating sensitive areas and patients with delicate skin, ensuring a comfortable and safe experience without compromising treatment efficacy. This mode enhances the machine's capability to cater to diverse treatment needs, including hair removal, tattoo removal, and vascular lesion therapy.

The Alexandrite Laser Machine boasts a user-friendly interface and customizable settings that allow practitioners to tailor treatments according to individual patient requirements. The intuitive touch screen control panel provides easy access to adjustable parameters such as pulse duration, energy level, and repetition rate. This flexibility ensures optimized treatment protocols for different skin types, hair colors, and targeted conditions, maximizing results while maintaining patient safety.

In addition to its technical excellence, the machine is designed with patient comfort in mind. It incorporates an advanced cooling system that cools the skin before, during, and after laser pulses, significantly reducing pain and minimizing thermal damage. This feature not only improves the overall patient experience but also allows for higher energy settings, leading to more effective and faster treatments.

Durability and reliability are key attributes of the Alexandrite Laser Machine. Built with high-quality components and rigorous engineering standards, it ensures consistent performance and a long service life. Maintenance is straightforward, and the machine is supported by comprehensive training and customer service, making it an excellent investment for clinics and medical spas seeking to expand their laser treatment offerings.

In summary, the Alexandrite Laser Machine is a versatile, efficient, and safe laser system that leverages the power of the Alex Laser 755 1064 wavelengths combined with the Long Pulse Gentle Pro Yag Laser mode. It is ideally suited for permanent hair removal, skin rejuvenation, pigmentation treatment, and vascular therapy across a wide range of skin types. With its advanced cooling technology, customizable settings, and user-friendly design, this machine delivers exceptional clinical results while ensuring patient comfort and safety. Whether you are a dermatologist, aesthetician, or medical professional, the Alexandrite Laser Machine represents a cutting-edge solution to meet the diverse needs of your patients and elevate your practice to the next level.

**Features:**

- Product Name: Alexandrite Laser Machine
- Advanced laser Beauty Machine technology for effective treatments
- Equipped with Long Pulse Gentle Pro Yag Laser for precise and gentle procedures
- High efficiency in hair removal and skin rejuvenation
- Safe and painless operation suitable for all skin types
- User-friendly interface for easy control and customization
- Durable design ensuring long-term performance
- Compact and portable for convenient use in various settings
- Includes cooling system to enhance patient comfort during treatments
- Widely recognized laser Beauty Machine in the aesthetics industry

**Technical Parameters:**

Product Name	Alex Laser 755 1064
Laser Type	Long Pulse Gentle Pro Yag Laser & Alexandrite Laser
Wavelength	755 nm (Alexandrite), 1064 nm (Nd:YAG)
Pulse Duration	5 ms - 100 ms
Spot Size	12 mm x 12 mm
Energy Density	1 - 120 J/cm <sup>2</sup>
Repetition Rate	1 - 10 Hz
Cooling System	Integrated Sapphire Contact Cooling
Applications	Alexandrite Hair Removal, Skin Rejuvenation, Tattoo Removal
Power Supply	AC 110V/220V, 50/60 Hz
Dimensions	1100 mm x 450 mm x 760 mm
