Product Description:

The Alexandrite Laser Machine, commonly known as the Alex Laser 755 1064, is a state-of-the-art laser beauty machine designed to deliver exceptional results in hair removal and skin rejuvenation treatments. This advanced device incorporates the powerful Alexandrite laser technology, operating primarily at a wavelength of 755 nm, which is highly effective for targeting melanin in hair follicles. The inclusion of the 1064 nm wavelength further enhances its versatility, making it suitable for a broader range of skin types and treatment applications. This dual-wavelength capability ensures that the Alexandrite Laser Machine is a top choice for clinics and beauty centers aiming to offer premium laser hair removal and skin care services.

One of the standout features of the Alex Laser 755 1064 is its precision and efficiency in Alexandrite Hair Removal. The 755 nm Alexandrite laser wavelength is particularly well-suited for removing unwanted hair from light to olive skin tones, providing fast and comfortable treatments with minimal discomfort. The laser energy is absorbed effectively by the melanin in the hair shaft and follicle, enabling targeted destruction of hair roots while preserving surrounding skin tissue. This results in long-lasting hair reduction and smoother skin, making it an ideal solution for clients seeking a non-invasive alternative to traditional hair removal methods like waxing or shaving.

In addition to its superior hair removal capabilities, the Alexandrite Laser Machine serves as a versatile laser beauty machine that can address a variety of skin concerns. The 1064 nm wavelength, commonly associated with Nd:YAG lasers, is integrated into this device to treat darker skin tones safely and effectively. This makes the machine suitable for a wider demographic, including individuals with deeper skin pigmentation who may be at higher risk of side effects with other laser systems. The 1064 nm wavelength also allows the machine to perform treatments such as vascular lesion removal, pigmentation correction, and skin tightening, broadening its application in aesthetic medicine.

The design of the Alex Laser 755 1064 emphasizes user-friendliness and patient comfort. It features an intuitive interface with customizable treatment settings, enabling practitioners to tailor the laser parameters according to individual patient needs and treatment areas. The machine is equipped with advanced cooling technology that helps to minimize discomfort and protect the skin during sessions. This cooling mechanism not only enhances patient comfort but also reduces the risk of thermal injury, ensuring safe and effective treatments across various skin types and conditions.

Durability and reliability are also key attributes of the Alexandrite Laser Machine. Built with high-quality components and cutting-edge laser technology, the device guarantees consistent performance and longevity. Regular maintenance is straightforward, supporting uninterrupted operation in busy clinical environments. Whether used in a dermatology clinic, medical spa, or cosmetic surgery center, the Alex Laser 755 1064 stands out as a dependable and efficient tool for delivering professional-grade laser hair removal and skin treatments.

In summary, the Alexandrite Laser Machine (Alex Laser 755 1064) represents a significant advancement in laser beauty technology. It offers precise, efficient, and safe Alexandrite Hair Removal, suitable for a wide range of skin types thanks to its dual-wavelength capabilities. As a versatile laser beauty machine, it extends its utility beyond hair removal to include various skin rejuvenation procedures, making it a valuable asset for any aesthetic practice. With its combination of performance, safety features, and user-oriented design, this machine provides both practitioners and clients with an excellent solution for achieving smooth, hair-free skin and enhanced skin appearance.

Features:

- High-performance Alexandrite Laser Machine for advanced skin treatments
- Equipped with Alex Laser 755 1064 technology for versatile applications
- Combines Long Pulse Gentle Pro Yag Laser for effective and gentle procedures
- Ideal laser Beauty Machine for hair removal, pigmentation, and vascular treatments
- Offers precise and efficient energy delivery for maximum safety and comfort
- User-friendly interface with customizable settings for different skin types
- Durable design ensuring long-lasting performance and reliability
- Compact and portable for easy integration into any beauty clinic or spa

Technical Parameters:

Product Name	Long Pulse Gentle Pro Yag Laser
Type	Alexandrite Laser Machine
Laser Type	Alexandrite Laser
Wavelength	755 nm
Pulse Duration	5 ms - 100 ms
Energy Density	1 - 60 J/cm ²
Spot Size	5 mm - 18 mm adjustable
Repetition Rate	1 - 10 Hz
Cooling System	Integrated Sapphire Contact Cooling
Display	Touch Screen
Application	Laser Beauty Machine for hair removal, skin rejuvenation, and tattoo removal
Dimensions	50 cm x 40 cm x 110 cm

Weight	35 kg
Power Supply	220V / 50Hz

Applications:

The Alexandrite Laser Machine, model Laser Alexandrite 755nm, is a cutting-edge laser beauty machine originating from Shandong, China. Renowned under the brand name health&beauty, this device is designed to cater to a variety of beauty and dermatological applications, making it an essential tool for professional clinics, beauty salons, and medical spas. Its advanced technology combines the power of Alex Laser 755 1064 wavelengths, offering versatile treatment options for different skin types and conditions.

This laser beauty machine is ideal for hair removal treatments due to its high precision and efficiency. It effectively targets hair follicles to provide long-lasting results, making it perfect for use in beauty salons and dermatology centers. Additionally, the Alexandrite Laser Machine is widely used in skin rejuvenation procedures, including the reduction of pigmentation, sunspots, and age spots. Its ability to treat vascular lesions and acne scars adds to its multi-functional appeal.

Thanks to its compact packaging in a sturdy box and a swift delivery time ranging from 1 to 7 days, the Laser Alexandrite 755nm machine is accessible for businesses looking to expand their service offerings quickly. With a supply ability of 100 sets and a minimum order quantity of just one unit, it is highly convenient for both small and large-scale operations. Payment terms are flexible, including T/T and Western Union, facilitating smooth transactions worldwide.

In professional settings, the laser beauty machine enhances client satisfaction by delivering safe, painless, and effective treatments.

Medical professionals appreciate its reliability and ease of use during aesthetic procedures. Whether used for hair removal, skin resurfacing, or pigmentation correction, the Alex Laser 755 1064 technology ensures optimal results with minimal downtime.

Overall, the Alexandrite Laser Machine from Shandong, China, branded as health&beauty, is a versatile and powerful tool suitable for various application occasions and scenarios. Its combination of advanced laser technology, quick delivery, and flexible purchasing options makes it an excellent investment for anyone in the beauty and medical aesthetics field seeking high-quality laser treatments.

Support and Services:

Product Technical Support and Services for the Alexandrite Laser Machine

Our Alexandrite Laser Machine is designed to deliver high performance and reliability for various aesthetic treatments. To ensure optimal operation and longevity of your device, we offer comprehensive technical support and services as outlined below.

Technical Support:

Our dedicated technical support team is available to assist with installation, setup, and troubleshooting. We provide guidance on machine operation, calibration, and maintenance procedures to help you achieve the best results safely and effectively.

Training Services:

We offer professional training sessions for operators and technicians to ensure proper use and handling of the Alexandrite Laser Machine. Training covers device features, safety protocols, treatment techniques, and routine maintenance.

Maintenance and Repairs:

Regular maintenance is crucial for the performance and safety of the laser machine. We provide scheduled maintenance services including system diagnostics, component inspection, cleaning, and replacement of worn parts. Our repair services address any hardware or software issues to minimize downtime.

Software Updates:

To keep your Alexandrite Laser Machine up to date with the latest features and improvements, we offer software updates. These updates enhance device functionality, safety, and user experience.

Warranty and Spare Parts:

The Alexandrite Laser Machine comes with a standard warranty covering manufacturing defects. We also supply genuine spare parts to maintain the quality and performance of your device.

For further assistance or to schedule service, please refer to your user manual or contact your authorized service provider.

Packing and Shipping:

Product Packaging:

The Alexandrite Laser Machine is carefully packaged to ensure maximum protection during transit. It is securely enclosed in a sturdy, custom-designed wooden crate with foam padding on all sides to prevent any damage. The machine components are individually wrapped with anti-static and shock-absorbing materials. All accessories, manuals, and cables are neatly organized and packed within the crate. The packaging is clearly labeled with handling instructions and fragile warnings to ensure careful transportation.

Shipping:

We offer worldwide shipping for the Alexandrite Laser Machine. The product is shipped via reliable courier services with tracking available for all orders. Depending on the destination, shipping options include air freight and sea freight to accommodate delivery time and cost preferences. Our logistics team coordinates closely with shipping partners to ensure timely and safe delivery. Customs documentation and support are provided to facilitate smooth import and clearance processes.

FAQ:

Q1: Where is the Alexandrite Laser Machine manufactured?

A1: The Alexandrite Laser Machine is manufactured in Shandong, China.

Q2: What is the model number of this Alexandrite Laser Machine?

A2: The model number is Laser Alexandrite 755nm.

Q3: What is the minimum order quantity for the Alexandrite Laser Machine?

A3: The minimum order quantity is 1 unit.

Q4: How is the Alexandrite Laser Machine packaged for delivery?

A4: The machine is securely packaged in a box to ensure safe delivery.

Q5: What payment methods are accepted for purchasing the Alexandrite Laser Machine?

A5: We accept T/T (Telegraphic Transfer) and Western Union as payment methods.

Q6: How long does it take to deliver the Alexandrite Laser Machine after placing an order?

A6: Delivery time ranges from 1 to 7 days depending on the destination and order processing.

Q7: What is the supply capability for the Alexandrite Laser Machine?

A7: We have the ability to supply up to 100 sets.
