Product Description:

The Alexandrite Laser Machine is a cutting-edge laser beauty machine designed to provide efficient and effective hair removal solutions... Incorporating advanced technology, this machine is equipped with the Alex Laser 755 1064 dual wavelength system, which ensures superior performance for a wide range of skin types and hair colors. Its precision and power make it an ideal choice for both professional clinics and beauty salons aiming to deliver top-tier Alexandrite Hair Removal services.

One of the standout features of this laser beauty machine is the integration of the Alex Laser 755 1064 technology. The 755 nm wavelength is particularly effective for targeting melanin in hair follicles, making it highly efficient for removing fine and light-colored hair. Meanwhile, the 1064 nm wavelength penetrates deeper layers of the skin, making it suitable for treating darker skin tones safely and effectively. This dual wavelength capability allows the Alexandrite Laser Machine to cater to a diverse clientele, ensuring optimal results without compromising on safety.

The Alexandrite Hair Removal process using this machine is fast, painless, and requires minimal downtime, which greatly enhances client satisfaction. The device's high repetition rate and large spot size enable quick treatment of large areas such as the back, legs, and arms, while its precision tip allows for detailed work on smaller or sensitive areas like the face and bikini line. This versatility makes the Alexandrite Laser Machine an invaluable tool for any beauty professional looking to expand their service offerings.

In addition to hair removal, the Alexandrite Laser Machine is often praised for its versatility in treating various skin conditions. It can be used for tattoo removal, pigmented lesion treatment, and skin rejuvenation, making it a multifunctional asset in any beauty or dermatology practice. The machine's user-friendly interface and adjustable settings allow practitioners to tailor treatments to individual client needs, ensuring safety and effectiveness across all procedures.

Safety is a paramount consideration in the design of the Alexandrite Laser Machine. It is equipped with advanced cooling systems that protect the skin during treatment, reducing discomfort and the risk of side effects. The machine also includes multiple safety protocols and certifications to comply with international standards, giving both operators and clients peace of mind during use.

Maintenance and operational efficiency are also key benefits of this laser beauty machine. The robust build quality and reliable components ensure long-term stability and minimal downtime, which is essential for busy clinics. Additionally, the machine is designed for easy maintenance and quick troubleshooting, allowing practitioners to focus more on delivering excellent client care and less on technical issues.

In summary, the Alexandrite Laser Machine featuring the Alex Laser 755 1064 technology represents the pinnacle of laser beauty machines available today. Its dual-wavelength system, versatility, safety features, and user-friendly design make it an excellent investment for professionals seeking to offer high-quality Alexandrite Hair Removal and other skin treatments. Whether for a growing beauty salon or an established dermatology clinic, this machine delivers outstanding performance, client satisfaction, and business growth potential.

Features:

- Advanced Alexandrite Laser technology for precise and effective treatments
- Equipped with Alex Laser 755 1064 for versatile hair removal and skin therapy
- Dual wavelength system: 755 nm Alexandrite and 1064 nm Nd:YAG laser
- Long Pulse Gentle Pro Yag Laser for safe and comfortable deep skin treatments
- Suitable for all skin types with adjustable pulse durations
- High repetition rate for faster treatment sessions
- User-friendly interface with customizable settings
- Efficient cooling system to minimize discomfort during procedures
- Compact and portable design for easy mobility and storage
- Clinically proven performance with durable and reliable components

Technical Parameters:

Product Name	Long Pulse Gentle Pro Yag Laser & Alexandrite Hair Removal Beauty Machine
Laser Type	Alexandrite Laser
Wavelength	755 nm
Pulse Width	3 ms - 100 ms (adjustable)
Spot Size	12 mm x 12 mm
Energy Density	1 - 60 J/cm ²
Repetition Rate	1 - 3 Hz
Cooling System	Integrated Sapphire Contact Cooling
Display	8.4 inch Color Touch Screen
Power Supply	AC 110V/220V, 50/60 Hz
Dimensions	480 mm x 370 mm x 1050 mm
Weight	50 kg
